

Marios J. Anagnostakis

managno@nuclear.ntua.gr

Marios Anagnostakis is Professor at the Nuclear Engineering Department of the School of Mechanical Engineering of the National Technical University of Athens (NTUA). He graduated from NTUA in 1988 and holds a Diploma in Mechanical Engineering. In 1998 he received his Ph.D. from NTUA under the title " γ -spectroscopic analysis of low-activity samples in the low-energy region". In 1993 he was trained at the Argonne National Laboratory in USA, in nuclear analytical techniques.

He has been member of the Nuclear Engineering Department of NTUA since 1992. His research interests include: ionizing radiation metrology, nuclear analytical techniques (INAA, XRF), natural radioactivity, Naturally Occurring Radioactive Materials (NORM), radioactive atmospheric aerosols, Monte-Carlo simulation and medical applications of ionizing radiation. He teaches at the undergraduate and postgraduate level a series of courses, such as "Interactions of Radiation with Matter, Dosimetry, Radiation Protection", "Nuclear Measurement Systems", "Engineering Measurements", "Medical Imaging and Radiotherapy" and "Radioenvironmental Analysis". He has taught for years in the PGEC (Postgraduate Educational Course in Radiation Protection and the Safety of Radiation Sources) and in several International Atomic Energy Agency (IAEA) seminars in Greece and abroad, as well as in a series of Erasmus+ Intensive Courses. He has more than 30 scientific publications in international scientific journals, dozens of presentations in international conferences, more than 450 references and he is a reviewer in a number of international scientific journals. He has participated in EU Programs and Actions (Concerted Actions, COST Programs, Erasmus+ Programs), has represented Greece in a number of IAEA Regional Programs, as well as meetings of the NEA (Nuclear Energy Agency) of OECD and the EURATOM Fission Program. He is NTUA delegate to ICRM (International Committee for Radionuclide Metrology). He has been a member of the NTUA Senate and many Senate Committees. Currently, he is the Director of the Nuclear Engineering Department of NTUA, Member of the Deanery of the School of Mechanical Engineering of NTUA and Member of the Board of the Greek Atomic Energy Commission.
